EVERY GENUINE COPY OF THIS BOOK HAS A HOLOGRAM

In our endeavour to protect you against counterfeit/fake books, we have pasted a copper hologram over the cover of this book. The hologram displays the full visual image, unique 3D multi-level, multi-colour effects of our logo from different angles when tilted or properly illuminated under a single light source, such as 3D depth effect, kinetic effect, pearl effect, gradient effect, trailing effect, emboss effect, glitter effect, randomly sparking tiny dots, micro text, laser numbering, etc.

A fake hologram does not display all these effects.

Always ask the bookseller to put his stamp on the first page of this book.

Preface to the Twelfth Edition

Knowledge updating is a never-ending process and so should be the revision of an effective textbook. The book originally written **fifty years ago** has, during the intervening period, been revised and reprinted several times. The authors have, however, been thinking, for the last few years that the book needed not only a thorough revision but rather a substantial rewriting. They now take great pleasure in presenting to the readers the **twelfth**, thoroughly revised and enlarged, **Golden Jubilee edition** of the book. The subject-matter in the entire book has been re-written in the light of numerous criticisms and suggestions received from the users of the earlier editions in India and abroad. The basis of this revision has been the emergence of new literature on the subject, the constructive feedback from students and teaching fraternity, as well as those changes that have been made in the syllabi and/or the pattern of examination papers of numerous universities.

Brief recall of some salient features of the present edition:

- The entire text has been restructured, rewritten and updated to cater to the revised syllabi of almost all universities, and various other professional examinations.
- During the course of rewriting, it has been specially borne in mind to retain all the basic features of the previous editions especially the simplicity of presentation, lucidity of style and analytical approach which have been appreciated by the readers throughout the country.
- A conscious effort has been made to make the presentation of all topics discussed very simple and to develop the subject-matter in such step-by-step manner that the book can serve as self-study text for the students.
- A number of typical problems have been added as solved examples in each chapter. These will enable the reader to have a better and thoughtful understanding of the basic concepts of the theory and its various applications.
- Several new topics have been added at appropriate places in various chapters to make the treatment of subject matter more exhaustive and up-to-date.

Some prominent additions are given below:

§ 6-5-1	:	Page 6-11	:	Variance of Degenerate Random Variable
§ 6-5-2	:	Page 6-12	:	Approximate Expression for Expectation and Variance
Remark 6	:	Page 6-40	:	$A \cdot M \geq G.M.$, Inequality
§ 6-7-4	:	Page 6-42	:	Lyapounov's Inequality
§ 6-7-5	:	Page 6-42	:	C_r Inequality
§ 6-7-6	:	Page 6-44	:	Holder's Inequality
§ 6-7-7	:	Page 6-45	:	Minkowski's Inequality

§ 6·9·1	:	Page 6·48	:	Double Expectation Rule or Double-E Rule
§ 6·9·2	:	Page 6·50	:	Conditional Variance
§ 6·9·3	:	Page 6·50	:	Wald's Theorem on Mean and Variance of a Random Sum
§ 6·9·4	:	Page 6·51	:	Multistage Rule for Expectation (Multi-stage-E Rule)
§ 7·4	:	Page 7·25 to Page 7·27	:	Theorem 7·1 to Theorem 7·5
§ 7·5·2	:	Page 7·38	:	Generalisation of Chebychev's Inequality
§ 7·5·3	:	Page 7·39	:	Frechet Inequality
§ 7·5·4	:	Page 7·39	:	Bernstein's Inequality
§ 7·6	:	Page 7·40	:	Modes of Convergence of Sequence of Random Variables
§ 7·6·1	:	Page 7·40 to Page 7·46	:	Convergence in Probability Theorems 7·11 to Theorem 7·16
§ 7·6·2	:	Page 7·46	:	Almost Sure Convergence or Convergence With Probability One
	:	Page 7·47	:	Theorem 7·17
§ 7·6·3	:	Page 7·48	:	Convergence in r th-Mean Theorems 7·18 and 7·19
§ 7·6·4	:	Page 7·50	:	Convergence in Law or Convergence in Distribution Theorems 7·20, 7·20(a), 7·20(b), 7·21
§ 7·6·5	:	Page 7·55	:	Relationship Between Various Modes of Convergence
§ 7·8	:	Page 7·72	:	Strong Law of Large Numbers
§ 7·8·1	:	Page 7·72	:	Kolmogorov's Inequality
§ 7·8·2	:	Page 7·75	:	Strong Law of Large Numbers (S.L.L.N.)
§ 7·8·3	:	Page 7·75	:	Kolmogorov's First Theorem on S.L.L.N.
§ 7·8·4	:	Page 7·76	:	Kolmogorov's Second Theorem on S.L.L.N.
§ 7·10·2	:	Page 7·85	:	Factorial Moments
§ 7·10·3	:	Page 7·85	:	Factorial Moment Generating Function
§ 8·4·3 (i)	:	Page 8·13	:	Factorial Moment Generating Function (Binomial Distribution)
§ 8·6·3	:	Page 8·54	:	Additive Property of Negative Binomial Distribution
§ 8·9·2	:	Page 8·70	:	Applications of Multinomial Distribution
Remarks 1, 2, 3	:	Page 9·67	:	On Cauchy Distribution
§ 9·13	:	Page 9·68	:	Erlang Distribution
§ 9·13·1	:	Page 9·69	:	Moments
§ 9·13·2	:	Page 9·69	:	Uses
§ 9·13·3	:	Page 9·70	:	Erlang Family of Distributions

§ 9.14	:	Page 9.71	:	Pareto Distribution
§ 9.14.1	:	Page 9.71	:	Moments
§ 9.14.2	:	Page 9.72	:	Conditional Distribution
§ 9.14.3	:	Page 9.73	:	Characterisation of Pareto Distribution
§ 9.14.4	:	Page 9.73	:	Basic Pareto Distribution
§ 9.14.5	:	Page 9.74	:	Applications
§ 9.14.6	:	Page 9.74	:	Relation With Other Distributions
§ 9.15	:	Page 9.75	:	Raleigh Distribution
§ 9.15.1	:	Page 9.76	:	Relation With Other Distributions
§ 9.15.2	:	Page 9.78	:	Moments of Raleigh Distribution
§ 9.15.3	:	Page 9.78	:	Applications and Some Illustrations
§ 11.2.5	:	Page 11.8	:	Explained and Un-explained Variation
§ 12.2.6	:	Page 11.9	:	Coefficient of Determination
§ 12.5.2	:	Page 12.12	:	Coefficient of Multiple Determination
§ 12.6.1	:	Page 12.16	:	Coefficient of Partial Determination
§ 15.6.6	:	Page 15.41	:	Test for Equality of Several Population Proportions
§ 17.6.5	:	Page 17.46	:	Method of Minimum Chi-Square
§ 19.5.5	:	Page 19.43	:	Weddle's Rule
§ 20.2	:	Page 20.17	:	Multivariate Normal (MVN) Distribution
§ 20.2.1	:	Page 20.18	:	MVND p.d.f.
§ 20.2.2	:	Page 20.22	:	M.G.F. of M.V.N.D. $N_p(\boldsymbol{\mu}, \Sigma)$
§ 20.2.3	:	Page 20.24	:	Marginal Distributions
§ 20.2.4	:	Page 20.25	:	Conditional Distributions
§ 20.2.5	:	Page 20.27	:	Standard M.V.N. Distribution
§ 20.2.6	:	Page 20.29	:	Characterisation of M.V.N. Distribution
§ 21.4	:	Page 21.25	:	Hermite Polynomials
§ 21.4.1	:	Page 21.27	:	Properties of Hermite Polynomials
§ 21.4.2	:	Page 21.30	:	Physicist's Hermite Polynomials
§ 21.4.3	:	Page 21.31	:	Expected Value of Hermite Polynomials
§ 21.5	:	Page 21.32	:	Gram Charlier Type-A Series
§ 21.6	:	Page 21.33	:	Edgeworth Type-A Series
§ 21.7	:	Page 21.36	:	Gram Charlier Polynomials
§ 21.7.1	:	Page 21.38	:	Properties of Gram Charlier Polynomials
§ 21.7.2	:	Page 21.38	:	Gram Charlier Type-B Series

Problem sets at the end of each chapter are substantially reorganised. Many new problems are included at the end of each chapter. Repetition of problems of the same type (more than what is necessary) has been avoided. Further, the problems have been carefully arranged and properly graded according to the level of difficulty.

- Solved examples and unsolved problems have been drawn from the latest examination papers of various universities, professional examinations, etc.

- An attempt has been made to rectify the errors in the previous edition.
- The present edition incorporates modern viewpoints. In fact with the addition of new topics, rewriting and revision of many others and restructuring of problem sets, altogether a new book, covering the revised syllabi of almost all the universities, is being presented to the reader. It is earnestly hoped that, in the new form, the book will prove of much greater utility to the students as well as teachers of the subject and research scholars.

A list of all the individuals to whom we owe gratitude would exhaust readers' patience and intimidate our memory. A less personal but still sincere way is to extend thanks to the students who endured, to the fellow colleagues and associates who contributed, to an environment that inspired, to the authors that permitted, to the reviewers that critiqued, and to our family that waited. To these donors, we dedicate whatever is worthwhile in the book; the shortcomings and vagaries are, however, our responsibility.

We express our deep sense of gratitude to our Publishers, SULTAN CHAND & SONS for their untiring efforts, unfailing courtesy, and co-operation in bringing out the book, in such an elegant form.

Suggestions and constructive criticism for further improvement of the book as well as intimation of errors and misprints will be most gratefully acknowledged. And of course, given complexity of the subject-matter, we crave for readers' indulgence for any omission, error or discrepancy that might have crept in the text despite due care and caution on our part.

S.C. GUPTA • V.K. KAPOOR

Preface to the First Edition

Although there are a large number of books available covering various aspects in the field of Mathematical Statistics, there is no comprehensive book dealing with the various topics on Mathematical Statistics for the students. The present book is a modest though determined bid to meet the requirements of the students of Mathematical Statistics at Degree, Honours and Post-graduate levels. The book will also be found of use by the students preparing for various competitive examinations. While writing this book our goal has been to present a clear, interesting, systematic and thoroughly teachable treatment of Mathematical Statistics and to provide a textbook which should not only serve as an introduction to the study of Mathematical Statistics but also carry the student on to such a level that he can read with profit the numerous special monographs which are available on the subject. In any branch of Mathematics, it is certainly the teacher who holds the key to successful learning. Our aim in writing this book has been simply to assist the teacher in conveying to the students more effectively a thorough understanding of Mathematical Statistics.

The book contains sixteen chapters. The first chapter is devoted to a concise and logical development of the subject. The second and third chapters deal with the frequency distributions, and measures of average and "dispersion. Mathematical treatment has been given to the proofs of various articles included in these chapters in a very logical and simple manner. The theory of probability which has been developed by the application of the set theory has been discussed quite in detail. A large number of theorems have been deduced using the simple tools of set theory. The simple applications of probability are also given. The chapters on mathematical expectation and theoretical distributions (discrete as well as continuous) have been written keeping the latest ideas in mind. A new treatment has been given to the chapters on correlation, regression and bivariate normal distribution using the concepts of mathematical expectation. The thirteenth and fourteenth chapters deal mainly with the various sampling distributions and the various tests of significance which can be derived from them. In chapter 15, we have discussed concisely statistical inference (estimation and testing of hypothesis). Abundant material is given in the chapter on finite differences and numerical integration. The whole of the relevant theory is arranged in the form of serialised articles which are concise and to the point without being insufficient. The more difficult sections will, in general, be found towards the end of each chapter. We have tried our best to present the subject so as to be within the easy grasp of students with varying degrees of intellectual attainment.

Due care has been taken of the examination needs of the students and, wherever possible, indication of the year, when the articles and problems were set in the

examination has been given. While writing this text, we have gone through the syllabi and examination papers of almost all Indian universities where the subject is taught so as to make it as comprehensive as possible. Each chapter contains a large number of carefully graded worked problems mostly drawn from university papers with a view to acquainting the student with the typical questions pertaining to each topic. Furthermore, to assist the student to gain proficiency in the subject, a large number of properly graded problems, mainly drawn from examination papers of various universities, are given at the end of each chapter. The questions and problems given at the end of each chapter, usually require for their solution, a thoughtful use of concepts. During the preparation of the text we have gone through a vast body of literature available on the subject, a list of which is given at the end of the book. It is expected that the bibliography given at the end of the book will considerably help those who want to make a detailed study of the subject.

The lucidity of style and simplicity of expression have been our twin objects to remove the awe which is usually associated with most mathematical and statistical textbooks.

While every effort has been made to avoid printing and other mistakes, we crave for the indulgence of the readers for the errors that might have inadvertently crept in. We shall consider our efforts amply rewarded if those for whom the book is intended are benefited by it. Suggestions for the improvement of the book will be highly appreciated and will be duly incorporated.

September 7, 1970

S.C. GUPTA • V.K. KAPOOR

We dedicate this book to

Our respected teacher Prof. Harish Chander Gupta who initiated the teaching of Mathematical Statistics at Post-graduate level at the University of Delhi in the year 1958.

... And with special thanks to our wives, who have cheerfully endured the hardships of an author's life and are always very supportive. We are proud of them.

... And most importantly, we must also put on record our gratitude to two great esteemed institutions, Hindu College and Shriram College of Commerce, (the constituent colleges of University of Delhi), for all that we learnt as a teacher for more than four decades from these premier institutions of South-east Asia

... Last but not the least, thanks to almighty God for giving us the talent to write and share the fruits of this wonderful gift with students.

Brief Contents

1. Introduction (Meaning and Scope)	1·1–1·12
2. Descriptive Measures (Measures of Central Tendency, Measures of Dispersion, Measures of Skewness, Measures of Kurtosis)	2·1–2·78
3. Theory of Probability – I	3·1–3·106
4. Theory of Probability – II	4·1–4·34
5. Random Variables and Distribution Functions	5·1–5·94
6. Mathematical Expectation	6·1–6·80
7. Generating Functions and Law of Large Numbers	7·1–7·102
8. Special Discrete Probability Distributions	8·1–8·100
9. Special Continuous Probability Distributions	9·1–9·128
10. Correlation	10·1–10·40
11. Curve Fitting and Regression Analysis	11·1–11·38
12. Multiple and Partial Correlation and Regression Analysis	12·1–12·28
13. Theory of Attributes	13·1–13·22
14. Large Sample Theory	14·1–14·42
15. Exact Sampling Distributions-I [Chi-square (χ^2) Distribution]	15·1–15·68
16. Exact Sampling Distributions-II [t, F and Z Distributions]	16·1–16·60
17. Statistical Inference – I (Theory of Estimation)	17·1–17·68
18. Statistical Inference – II (Testing of Hypothesis and Non-Parametric methods)	18·1–18·62
19. Finite Differences and Numerical Analysis	19·1–19·56
20. Bivariate and Multiivariate Normal Distributions	20·1–20·38
21. Some Additional Topics	21·1–21·40
Appendices	A·1–A·18
Index	I·1–I·8

Contents

1. Introduction (Meaning and Scope)	1·1 – 1·12
1·1. Origin and Development of Statistics	1·2
1·2. Statistics Defined	1·3
1·3. Importance and Scope of Statistics	1·5
1·4. Limitations of Statistics	1·7
1·5. Distrust of Statistics	1·8
1·6. Role of Computers in Solving Statistics Problems	1·9
Chapter Concepts Quiz	1·10
Discussion and Review Questions	1·11
2. Descriptive Measures (Measures of Central Tendency, Measures of Dispersion, Measures of Skewness, Measures of Kurtosis)	2·1 – 2·78
2·1. Introduction	2·4
2·2. Frequency Distribution	2·4
2·3. Graphic Representation of a Frequency Distribution	2·7
2·4. Averages (or Measures of Central Tendency)	2·9
2·5. Arithmetic Mean	2·9
2·6. Median	2·14
2·7. Mode	2·18
2·8. Geometric Mean	2·22
2·9. Harmonic Mean	2·24
2·10. Selection of an Average	2·26
2·11. Partition Values	2·26
Supplementary Examples on Measures of Central Tendency	2·29
Assorted Review Problems on Measures of Central Tendency	2·35
2·12. Dispersion	2·39
2·13. Measures of Dispersion	2·40
2·14. Coefficients of Dispersion	2·48
Assorted Review Problems on Measures of Dispersion	2·50
2·15. Moments	2·53
2·16. Skewness	2·58
2·17. Kurtosis	2·60
Supplementary Examples on Measures of Dispersion, Skewness and Kurtosis	2·63
Assorted Review Problems on Moments & Measures of Skewness & Kurtosis	2·69
Chapter Concepts Quiz	2·71
Supplementary Review Problems for Self-Assessment	2·75

3. Theory of Probability – I	3-1–3-106
3-1. Introduction	3-2
3-2. Short History	3-3
3-3. Basic Terminology	3-3
3-4. Mathematical (or Classical or ‘A Priori’) Probability	3-5
3-5. Statistical (or Empirical) Probability	3-6
3-6. Subjective Probability	3-18
3-7. Mathematical Tools : Preliminary Notions of Sets	3-18
3-8. Axiomatic Approach to Probability	3-21
3-9. Some Theorems on Probability	3-29
3-10. Conditional Probability	3-41
3-11. Multiplication Theorem of Probability	3-42
3-12. Independent Events	3-43
3-13. Multiplication Theorem of Probability for independent Events	3-44
3-14. Extension of Multiplication Theorem of Probability to n Events	3-44
3-15. Pairwise Independent Events	3-48
Supplementary Examples on Addition and Multiplication Theorems	3-51
Some Miscellaneous Examples	3-65
3-16. Matching Problem	3-69
Chapter Concepts Quiz	3-82
Discussion and Review Questions	3-85
Assorted Review Problems for Self-Assessment	3-89
4. Theory of Probability – II	4-1–4-34
4-1. Extended Axiom of Addition and Axiom of Continuity	4-2
4-2. Bayes’ Theorem	4-4
Supplementary Examples on Bayes Theorem	4-14
4-3. Geometric Probability	4-22
Supplementary Examples on Geometric Probability	4-23
Discussion and Review Questions	4-26
Assorted Review Problems for Self-Assessment	4-27
Problems on Bayes’ Theorem	4-27
Problems on Geometric Probability	4-33
5. Random Variables and Distribution Functions	5.1–5-94
5.1. Introduction	5-3
5.2. Distribution Function	5-5
5.3. Discrete Random Variable	5-6
5-4. Continuous Random Variable	5-12
5-5. Two-Dimensional Random Variables	5-34
5-6. Transformation of One-Dimensional Random Variable	5-64
5-7. Transformation of Two-Dimensional Random Variable	5-67
5-8. Transformation of n-Dimensional Random Variable	5-73
Chapter Concept Quiz	5-74

Discussion and Review Questions	5-76
Assorted Review Problems for Self-Assessment	5-77
6. Mathematical Expectation	6-1 – 6-80
6-1. Introduction	6-3
6-2. Mathematical Expectation or Expected Value of a Random Variable	6-3
6-3. Expected Value of Function of A Random Variable	6-4
6-4. Properties of Expectation	6-6
6-5. Properties of Variance	6-11
6-6. Covariance	6-14
6-7. Some Inequalities Involving Expectation	6-38
6-8. Moments of Bivariate Probability Distributions	6-45
6-9. Conditional Expectation and Conditional Variance	6-48
Supplementary Examples on Conditional Expectation	6-58
Chapter Concepts Quiz	6-61
Discussion and Review Questions	6-62
Assorted Review Problems for Self-Assessment	6-63
7. Generating Functions and Law of Large Numbers	7-1 – 7-102
7-1. Moment Generating Function	7-3
7-2. Cumulants	7-7
7-3. Characteristic Function	7-12
7-4. Some Important Theorems on Characteristic Functions	7-25
7-5. Chebychev's Inequality	7-35
7-6. Modes of Convergence of a Sequence of Random Variables	7-40
7-7. Weak Law of Large Numbers (W.L.L.N.)	7-57
7-8. Strong Law of Large Numbers (S.L.L.N.)	7-72
7-9. Borel-Cantelli Lemma (Zero-One Law)	7-78
7-10. Probability Generating Function (<i>p.g.f.</i>)	7-81
Chapter Concepts Quiz	7-91
Discussion and Review Questions	7-93
Assorted Review Problems for Self-Assessment	7-94
8. Special Discrete Probability Distributions	8-1 – 8-100
8-1. Introduction	8-3
8-2. Discrete Uniform Distribution	8-3
8-3. Bernoulli Distribution	8-3
8-4. Binomial Distribution	8-4
Supplementary Examples on Binomial Distribution	8-27
8-5. Poisson Distribution	8-30
Supplementary Examples on Poisson Distribution	8-49
8-6. Negative Binomial Distribution	8-52
8-7. Geometric Distribution	8-60
8-8. Hyper Geometric Distribution	8-63
8-9. Multinomial Distribution	8-67

8-10. Power Series Distributions (P.S.D.).	8-71
Chapter Concepts Quiz	8-74
Discussion and Review Questions	8-76
Assorted Review Problems for Self-Assessment	8-81
9. Special Continuous Probability Distributions	9-1–9-128
9-1. Introduction	9-4
9-2. Normal Distribution	9-4
Supplementary Examples on Normal Distribution	9-24
9-3. Rectangular (or Uniform) Distribution	9-30
9-4. Triangular Distribution	9-35
9-5. Gamma Distribution	9-37
9-6. Beta Distribution of First Kind	9-42
9-7. Beta Distribution of Second Kind	9-46
Supplementary Examples on Uniform, Gamma and Beta Distributions	9-47
9-8. Exponential Distribution	9-53
9-9. Standard Laplace (Double Exponential) Distribution	9-57
9-10. Weibul Distribution	9-59
9-11. Logistic Distribution	9-61
9-12. Cauchy Distribution	9-63
9-13. Erlang Distribution	9-68
9-14. Pareto Distribution	9-71
9-15. Raleigh Distribution	9-75
9-16. Central Limit Theorem (C.L.T.)	9-79
9-17. Compound Distributions	9-85
9-18. Order Statistics	9-87
9-19. Truncated Distributions	9-95
Chapter Concepts Quiz	9-97
Discussion and Review Questions	9-101
Assorted Review Problems for Self-Assessment	9-106
10. Correlation	10-1–10-40
10-1. Introduction	10-2
10-2. Meaning of Correlation	10-2
10-3. Scatter Diagram	10-2
10-4. Karl Pearson's Coefficient of Correlation	10-2
10-5. Calculation of the Correlation Coefficient for a Bivariate Frequency Distribution	10-12
10-6. Probable Error of Correlation Coefficient	10-16
10-7. Rank Correlation	10-16
Supplementary Examples on Correlation	10-23
Chapter Concepts Quiz	10-29
Discussion and Review Questions	10-31
Assorted Review Problems for Self-Assessment	10-31

11. Curve Fitting and Regression Analysis	11.1–11.38
11.1. Introduction	11.2
11.2. Linear Regression	11.2
11.3. Curvilinear Regression	11.14
11.4. Regression Curves	11.17
Supplementary Examples	11.21
11.5. Correlation Ratio	11.24
11.6. Intra-Class Correlation	11.27
Chapter Concepts Quiz	11.29
Discussion and Review Questions	11.31
Assorted Review Problems for Self-Assessment	11.32
12. Multiple and Partial Correlation and Regression Analysis	12.1–12.28
12.1. Introduction	12.3
12.2. Multiple and Partial Correlation and Regression	12.3
12.3. Plane of Regression	12.4
12.4. Properties of Residuals	12.8
12.5. Coefficient of Multiple Correlation	12.10
12.6. Coefficient of Partial Correlation	12.14
12.7. Expression for Regression Coefficient in Terms of Regression Coefficients of Lower Order	12.19
12.8. Expression for Partial Correlation Coefficient in Terms of Partial Correlation Coefficients of Lower Order	12.20
Supplementary Examples	12.21
Chapter Concepts Quiz	12.25
Discussion and Review Questions	12.26
Assorted Review Problems for Self-Assessment	12.27
13. Theory of Attributes	13.1–13.22
13.1. Introduction	13.2
13.2. Notations and Terminology	13.2
13.3. Classes and Class Frequencies	13.2
13.4. Consistency of Data	13.6
13.5. Independence of Attributes	13.8
13.6. Association of Attributes	13.10
Supplementary Examples	13.15
Chapter Concepts Quiz	13.18
Discussion and Review Questions	13.18
Assorted Review Problems for Self-Assessment	13.19
14. Large Sample Theory	14.1–14.42
14.1 Introduction	14.3
14.2 Types of Sampling	14.3
14.3 Parameter and Statistic	14.5
14.4 Tests of Significance	14.7

14.5 Procedure for Testing of Hypothesis	14.10
14.6 Tests of Significance for Large Samples	14.11
14.7 Sampling of Attributes	14.12
14.8 Sampling of Variables	14.23
Discussion and Review Questions	14.35
Assorted Review Problems for Self-Assessment	14.36
15. Exact Sampling Distributions-I [Chi-square (χ^2) Distribution]	15.1–15.68
15.1 Introduction	15.3
15.2 Derivation of the Chi-Square (χ^2) Distribution	15.3
15.3 M.G.F. of Chi-Square Distribution	15.7
15.4 Some Theorems on Chi-Square Distribution	15.11
15.5 Linear Transformation	15.16
15.6 Applications of Chi-Square Distribution	15.23
15.7 Non-Central χ^2 -Distribution	15.52
Chapter Concepts Quiz	15.55
Discussion and Review Questions	15.56
Assorted Review Problems for Self-Assessment	15.59
16. Exact Sampling Distributions-II (t, F and Z Distributions)	16.1–16.60
16.2 Student's 't' Distribution	16.3
16.3 Applications of t-Distribution	16.13
16.4 Distribution of Sample Correlation Coefficient when Population Correlation Coefficient, $\rho = 0$ (Sawkin's Method)	16.26
16.5 Non-Central t-Distribution	16.29
16.5 F-Distribution	16.30
16.7 Applications of F-Distribution	16.37
16.8 Relation between t And F Distributions	16.41
16.9 Relation between F and χ^2 Distributions	16.42
16.10 Non-Central F-Distribution	16.43
16.11 Fisher's Z-Distribution	16.45
Discussion and Review Questions	16.49
Assorted Review Problems for Self-Assessment	16.51
17. Statistical Inference-I (Theory of Estimation)	17.1–17.68
17.1. Introduction	17.3
17.2. Characteristics of Estimators	17.3
17.3. Cramer-Rao Inequality	17.19
17.4. Complete Family of Distributions	17.25
17.5. MVU and Blackwellisation	17.28
17.6. Methods of Estimation	17.30
17.7. Confidence Interval and Confidence Limits	17.47
Chapter Concepts Quiz	17.53
Discussion and Review Questions	17.55
Assorted Review Problems for Self-Assessment	17.58

18. Statistical Inference-II	18.1–18.62
(Testing of Hypothesis and Non-parametric Methods)	
18.1. Introduction	18.3
18.2. Statistical Hypothesis — Simple and Composite	18.3
18.3. Steps in Solving Testing of Hypothesis Problem	18.7
18.4. Optimum Test under Different Situations	18.7
18.5. Neyman J. and Pearson, E.S. Lemma	18.8
18.6. Likelihood Ratio Test	18.21
18.7. Non-Parametric Methods	18.39
18.8. Sequential Analysis–Introduction	18.46
Chapter Concepts Quiz	18.51
Discussion and Review Questions	18.52
Assorted Review Problems for Self-Assessment	18.53
19. Finite Differences and Numerical Analysis	19.1–19.58
19.1. Introduction	19.3
19.2. Finite Difference Table	19.3
19.3. Interpolation	19.17
19.4. Interpolation with Arguments at Unequal Intervals	19.24
19.5. Numerical Integration	19.38
Discussion and Review Questions	19.47
Assorted Review Problems for Self-Assessment	19.48
20. Bivariate and Multiivariate Normal Distribution	20.1–20.38
20.1. Bivariate Normal Distribution	20.2
20.2. Multivariate Normal (MVN) Distribution	20.17
Discussion and Review Questions	20.30
Assorted Review Problems for Self Assessment	20.31
21. Some Additional Topics	21.1–21.40
21.1. Pearsonian Distributions and Their Genesis	21.3
21.2. Variate Transformations	21.13
21.3. Curve Fitting by Orthogonal Polynomials	21.16
21.4. Hermite Polynomials	21.25
21.5. Gram-Charlier Type - A Series	21.32
21.6. Edgeworth Type - A Series	21.33
21.7. Gram Charlier’s Polynomials	21.36
Appendix 1 – Bibliography (Suggested Further Readings)	A.1–A.2
Appendix 2 – Numerical Tables	A.3–A.18
Table I : Logarithms	A.1
Table I : Logarithms	A.2
Table II : Antilogarithms	A.3

Table II	: Antilogarithms	A.6
Table III	: Powers, Roots and Reciprocals	A.7
Table III	: Powers, Roots and Reciprocals	A.8
Table IV	: Binomial Coefficients	A.9
Table V	: Values of e^{-m} or $\exp(-m)$	A.9
Table VI	: Areas Under Standard Normal Probability Curve	A.10
Table VI A	: Ordinates of The Normal Probability Curve	A.11
Table VII	: Critical Values $\chi^2(\alpha)$ of Chi-Square Distribution (Right Tail Areas) For Given Probability α	A.12
Table VIII	: Critical Values of Student's t-Distribution	A.13
Table IX	: Critical Values of The Variance-Ratio – 5% Points	A.14
Table IX-A	: Critical Values of The Variance-Ratio – 1% Points	A.15
Table IX-B	: Critical Values of The Variance Ratio F-Distribution – 2.5% Points	A.16
Table X	: Conversion of Pearson's r Into Corresponding Fisher's Z-Statistic	A.17
A-18	Blank	

Feedback Prize Contest

NO ENTRY FEE

We propose to mail to our readers a 'Supplement' relevant to the subject-matter of this book or 'A Word about Your Career' or 'Pearls of Wisdom' or 'Secrets of Success' on receipt of your 'Feedback'. Further, you can win a prize too!! For this purpose, please fill this coupon and send it along with your 'Feedback' to us at **M/s Sultan Chand & Sons, 23, Daryaganj, New Delhi-110 002**, at an early date. To avoid duplication, please inform what you had received earlier. This is without obligation.

How did you come to know of this book : Recommended by your Teacher/Friend/Bookseller/

Feedback

Now You Can Win a Prize Too!!

Dear Reader

Reg. *Fundamentals of Mathematical Statistics* by S. C. Gupta & V. K. Kapoor

Has it occurred to you that you can do to the students/the future readers a favour by sending your suggestions/comments to improve the book? In addition, a surprise gift awaits you if you are kind enough to let us have your frank assessment, helpful comments/specific suggestions in detail about the book on a separate sheet as regards the following :

1. Which topics of your syllabus are inadequately or not discussed in the book from the point of view of your examination?

.....
.....
.....

2. Is there any factual inaccuracy in the book? Please specify.

.....
.....
.....

3. What is your assessment of this book as regards the presentation of the subject-matter, expression, precision and price in relation to other books available on this subject?

.....
.....
.....

4. Which competing books you regard as better than this? Please specify their authors and publishers.

1.
2.
3.

5. Any other suggestion/comment you would like to make for the improvement of the book.

.....
.....
.....

Further, you can win a prize for the best criticism on presentation, contents or quality aspect of this book with useful suggestions for improvement. The prize will be awarded each month and will be in the form of our publications as decided by the Editorial Board.

Please feel free to write to us if you have any problem, complaint or grievance regarding our publications or a bright idea to share. We work for you and your success and your Feedback are valuable to us.

Thanking you.

Yours faithfully,
Sultan Chand & Sons

About the Book

A textbook written completely on modern lines for undergraduate & post graduate courses in Statistics, Mathematics, Economics, Computer Science, Engineering and Indian Civil Services & Indian Statistical Service Examinations. The thoroughly revised, (Golden Jubilee) TWELFTH EDITION of this indispensable, authoritative, well-written & best selling textbook, while retaining its analytical and modern approach now includes a large number of new topics, extensively revised and rewritten material, updated information and various distinct new features.

About the Authors

S.C. Gupta, (born 1937) has a brilliant academic record with Honours in Mathematics (1957), from Punjab University, Post-Graduation in Mathematical Statistics (1959) and Mathematics (1966), both from University of Delhi, and M.S. in Statistics (1971-72) from the University of North Carolina, Chapel Hill (U.S.A). Mr. Gupta started his teaching career since July 1960 as a lecturer in the Department of Statistics, Meerut College, Meerut and then as Associate Lecturer in Statistics at I.I.T. Kharagpur. He was an eminent and dedicated faculty member of Hindu College, University of Delhi, since September 1963 and retired as Associate Professor of Statistics in November 2002. Mr. Gupta was a *Visiting Scientist* at Clark Atlanta University, Atlanta GA, (U.S.A) in 2002. During his teaching career

spanning over four decades, Mr. Gupta has taught numerous Statistics courses like Statistical Methodology, Theory of Probability, Probability Distributions, Applied Statistics, Sample Surveys and Sampling Techniques, Design of Experiments, Theory of Estimation and Testing of Hypothesis, etc. at the Under-graduate (Honours) level. He has also been associated with post-graduate teaching at the Department of Statistics, University of Delhi, for over 15 years. A well-established author of international repute, he has written books on Mathematical Statistics, Fundamentals of Statistics, Applied Statistics, Business Statistics, Engineering Mathematics and Matrices, which have been prescribed as text-books/reference books in most of the universities. Reading, writing and teaching are still his main passion.

V.K. Kapoor, (born 1947) has had a brilliant academic record with Post-Graduation in Mathematical Statistics (1968) from Delhi University. An eminent and dedicated faculty member of Shriram College of Commerce, University of Delhi, since December 1968, retired as Associate Professor in April 2012. He has also been associated with post-graduate teaching for seven years. A well-established author of international repute, has written books on Mathematical Statistics, Applied Statistics, Operations Research, Business Mathematics, Business Statistics, Quantitative Techniques for Management, Engineering Mathematics which have been prescribed as text-books in most of the universities, professional and management institutes of numerous countries of the world.

Reading and writing are still his main passion.
